

LINUS KIBET

Software Engineer | Full-Stack & AI Systems Developer

[Portfolio](#) | [GitHub](#)

Nairobi, Kenya | linuslinus020@gmail.com | +254 798 749 123

PROFESSIONAL SUMMARY

Software Engineer with experience building scalable web applications, backend systems, and data-driven solutions across enterprise and business environments. Skilled in software development, system integration, workflow automation, and modern application architecture, with exposure to AI-powered technologies and machine learning concepts. Strong foundation in problem-solving, application design, and developing efficient, production-ready solutions.

TECHNICAL SKILLS

Programming

Python, PHP, JavaScript, TypeScript, SQL, C#

Web & Software Development

React.js, Angular, Node.js, Flask, REST APIs, Backend Integration

AI & Data Technologies

Machine Learning Fundamentals, Deep Learning (CNNs), LLM Applications, Prompt Engineering, RAG Architecture, Embeddings, Model Evaluation, Data Analysis, Feature Engineering.

Cloud & Infrastructure

AWS (EC2, S3 Basics), System Debugging, Workflow Automation

Databases

PostgreSQL, MySQL, MongoDB, Pinecone (Vector DB)

Tools & Platforms

Git, GitLab, API Testing, Linux, n8n, Zapier

AI Ecosystem & APIs

Hugging Face, TensorFlow, OpenAI APIs, Mistral, OpenRouter

PROFESSIONAL EXPERIENCE

Frontend Developer — Venturseed (Remote, New York)

Oct 2025 – Present

- Developed and maintained React-based user interfaces integrated with backend APIs
- Improved application performance, reducing page load time by 45%
- Built reusable UI components to support scalability and maintainability

Full-Stack Developer — Zeraki (Nairobi)

Jul 2025 – Nov 2025

- Improved Angular application performance and UI responsiveness
- Contributed to backend integrations and bug fixes, enhancing system stability

- Collaborated with design teams to ensure consistent UI/UX standards

Application Developer — Kenyatta University Teaching, Referral & Research Hospital

Jan 2025 – Jul 2025

- Supported development of internal web systems using PHP and JavaScript
- Improved internal workflows through system enhancements
- Assisted in ICT support including troubleshooting and system maintenance

KEY PROJECTS

AI Skin Disease Detection System (CNN-based)

- Winner, Inter-University AI Hackathon (Kenya)
- Built a deep learning model for skin condition classification using TensorFlow
- Integrated model with a web-based interface for real-time predictions

NumeraAI – AI Bookkeeping Assistant

- Developed an AI-powered system for automating financial record management
- Reduced manual bookkeeping workload and improved reporting efficiency

Murang'a University RAG Chatbot (June – August 2025)

- Built an AI chatbot using Python and vector search to retrieve academic information
- Improved response time for student queries significantly

AI-Powered Customer Intelligence & Engagement System (20th February 2026)

- Designed and developed an AI-driven system to help small businesses analyze customer behavior and generate actionable sales insights.
- Built customer segmentation models using behavioral and transactional data.
- Implemented predictive analytics to identify high-value customers and churn risks.
- Developed an intelligent recommendation module to personalize product suggestions.

EDUCATION

Bachelor of Business Information Technology (BBIT)

Murang'a University of Technology | 2022 – 2026

CERTIFICATIONS

- Cisco Cybersecurity Essentials – Cisco Networking Academy (Summer Camp June-August 2025)
 - Cisco AI Fundamentals – Cisco Networking Academy (Summer Camp June-August 2025)
 - DevOps Engineering Path – KodeKloud (100 Days DevOps Challenge October-December 2025)
 - Data Analysis (SPSS & STATA) – KESAP Research Centre (September- October 2023)
-

OPENSOURCE CONTRIBUTIONS

- Contributor – Avalanche ecosystem (blockchain infrastructure initiatives and outreach program at Murang'a University of Technology)
 - Contributor – Fedora Project (Linux distribution community contributions)
-

OPENSOURCE CONTRIBUTIONS

- Contributor – Avalanche ecosystem (blockchain infrastructure initiatives and outreach program at Murang'a University of Technology)
- Contributor – Fedora Project (Linux distribution community contributions)
