

LINUS KIBET

IT Support & Software Engineer | Full-Stack, AI & Technical Support

Nairobi, Kenya | linzskybes@gmail.com | +254 798 380 680 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science graduate with range across IT support and software engineering: hands-on technical support (desktop, network, hardware, ticketing), full-stack web and mobile development (React, React Native, Node.js, PHP, Laravel, Vue/Nuxt), and applied AI/ML (RAG systems, prompt engineering, predictive modelling). Comfortable working at any point on that spectrum — troubleshooting a user's laptop, configuring an ERP system, or building and deploying a full application. Fast learner, reliable, and detail-oriented, with real experience across healthcare, fintech-adjacent, and startup contract environments.

TECHNICAL SKILLS

IT Support & Infrastructure: Desktop Troubleshooting & Installation, Hardware Troubleshooting & Repair, Network Troubleshooting (LAN/WAN), Cable Patching, CCTV Troubleshooting, Ticketing Systems, Windows & Linux

Languages: JavaScript, TypeScript, Python, PHP, Java, SQL, C#

Web & Mobile Frameworks: React.js, Node.js, Angular, Vue.js, Nuxt.js, React Native, Laravel, FastAPI, Flask, WordPress

Databases: MySQL, PostgreSQL, SQLite, MongoDB

ERP & CMS: ERPNext (configuration & customization), WordPress (themes, plugins, maintenance)

QA & Testing: Manual Testing (Functional & Regression), Defect Documentation, Jira, Trello, Postman

AI / LLM: Prompt Engineering, RAG Architecture, LLM Integration, Predictive Modelling (TensorFlow, CNNs)

Cloud & DevOps: AWS (EC2, S3), Git, GitLab, CI/CD Concepts

PROFESSIONAL EXPERIENCE

Frontend Developer | Venturseed, Remote — New York

Apr 2026 – Aug 2026 (Contract)

- Built and maintained React-based interfaces fully integrated with REST APIs, and built a React Native mobile version of the core web product.
- Contributed to Vue.js and Nuxt.js modules on select project areas, extending frontend functionality alongside the core React codebase.
- Optimized application performance (45% reduction in page load time) and designed a reusable component library (30+ components) that cut feature development time by an estimated 40%.

IT Support & Application Developer | Kenyatta University Teaching, Referral & Research Hospital, Nairobi, Kenya

Jan 2025 – Sep 2025 (Internship)

- Rotated across Support and Application departments: desktop troubleshooting, installation, hardware repair, network troubleshooting, cable patching, and CCTV troubleshooting/repair, logged through the department's ticketing system.
- Developed web applications (PHP, JavaScript) and mobile application features (Java), and built/maintained hospital websites using WordPress, customizing themes and plugins.
- Configured and customized ERPNext modules to support hospital administrative workflows.
- Prepared and executed manual test cases (functional and regression), documenting and verifying bugs using Jira/Trello and validating data with SQL and Postman.
- Provided first-line technical support to hospital staff and prepared technical documentation for knowledge transfer.

KEY PROJECTS

MamaCare | Predictive Digital Triage & Emergency Alerting Platform

- Built a real-time maternal health triage platform: 94.2% prediction accuracy, FastAPI + SSE backend (7.4s alert delivery), RAG-powered AI assistant.

Numerai | AI-Powered Financial Bookkeeping Assistant

- Built a full-stack system automating financial record management with LLM-powered natural language querying over financial data.

Murang'a University RAG Chatbot

- Built a Retrieval-Augmented Generation chatbot (Python, Pinecone, LLM integration) serving academic information with significantly improved response time.

Campus Coffee Ordering Platform | Personal Project, Laravel

- Built a Laravel-based ordering platform for university students, designing the database schema and backend order/payment logic.

AI Skin Disease Detection Module (CNN) | Inter-University Hackathon Winner

- Built and deployed a CNN-based image classification model for skin condition detection, owning the pipeline end-to-end.

EDUCATION

Bachelor of Science in Computer Science | Murang'a University of Technology, Murang'a, Kenya

2022 – Apr 2026 (Graduated Aug 2026)

CERTIFICATIONS

- Cisco AI Fundamentals — Cisco Networking Academy (Aug 2025)
- Cisco Cybersecurity Essentials — Cisco Networking Academy (Aug 2025)
- DevOps Engineering Path — KodeKloud, 100 Days DevOps Challenge (Dec 2025)
