Personal Statement

Driven and highly analytical Computer Science undergraduate at Murang'a University of Technology, specializing in software development, data structures, and cutting-edge technologies such as artificial intelligence and system security. Skilled in programming, web development, AI modelling and database management, with a proven track record of designing and implementing innovative, efficient solutions. A quick learner with a strong passion for continuous improvement, I excel in teamwork, problem-solving, and adapting to the ever-evolving tech landscape. Eager to apply my technical expertise and creative mindset to make a meaningful impact in the tech industry.

Education

Bachelor of Science in Computer Science

Expected Graduation: [August, 2026]

Murang'a University of Technology, Kenya

- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Web Development, Machine Learning, Database Systems and Management, Computer Networks

Kenya Certificate of Secondary Education (KCSE)

April 2022

Litein High School, Kenya

- Grade: B+

Kenya Certificate of Primary Education (KCPE)

November 2017

Royal Top-mark School, Kenya

- Marks: 398/500
-

Technical Skills

- **Programming Languages:** Python, Java, C#, Visual Programming, TypeScript, C++, Kotlin, SQL
- **Web Technologies:** HTML5, JavaScript, React, Node.js
- **Frameworks:** Spring Boot, AngularJS, ASP.NET
- **Databases:** MySQL, MongoDB, Oracle Database, Firebase
- **Tools & Platforms:** Git, GitHub, Linux, Docker, VS code, Visual Studio 2022, Android Studio

- **Other Skills:** Problem-Solving, Algorithm Design, Software Development, Data Analysis
-

Projects

Skin Disease Detection and Diagnosis Using CNN and Transfer Learning – Hackathon Winner, September 2024 – December 2024

Collaborated with a team of 4 to develop an AI model for skin disease detection using Convolutional Neural Networks (CNN) and transfer learning, achieving accurate diagnosis of various skin conditions and winning a hackathon for innovative AI applications.

Hostel Management System – January 2025 – April 2025

Developed a robust Hostel Management System using C#, streamlining booking, allocation, and maintenance processes for administrators.

VPN Provider App – September 2024 – December 2024

Designed a secure VPN provider app using Kotlin for Android, integrating authentication protocols, optimizing server connections, and utilizing Git/GitHub for version control.

Responsive E-Commerce Website – June 2024 – August 2024

Built a responsive e-commerce website with HTML, CSS, and JavaScript, incorporating secure payment gateways, dynamic product listings, and ensuring cross-device compatibility.

Extracurricular Activities

MUT TECH Club Member

Murang'a University of Technology

March 2023 – Present

- Actively participate in coding challenges and mini hackathons, sharpening problem-solving skills and expanding technical knowledge.
- Collaborate with peers to develop innovative solutions in team-based coding events.

Volunteer Wi-Fi Infrastructure Developer

Bomet County, Kenya

June 2024 – Present

- Contributed to the development of Wi-Fi infrastructure in various areas of Bomet County, improving internet access for the local community.
 - Worked with local teams to plan and implement network installations, providing technical support and ensuring sustainability.
-

Certifications

- **Google IT Support** – Coursera (June 2024)
 - **Cisco Computer Repair and Maintenance** – Cisco Academy (March, 2023)
 - **SPSS and STATA**- Kesap Research Center (February 2023)
-

Achievements

Winner, KAPS/Inter-University Hackathon, JKUAT – *November 2024*

Developed an AI model for skin disease detection using Convolutional Neural Networks (CNN) and transfer learning in the AI for Health category, winning first place for innovative use of AI in healthcare.
